

Charles & Associates

SENIOR INFRASTRUCTURE & HIGHWAYS DESIGN ENGINEER

Location: Hook (Hampshire)

About the opportunity and you

At Charles & Associates Consulting Engineers we pride ourselves in pushing boundaries, harnessing innovation and sharing insights across our teams. Join us and you will be part of an organisation that takes pride in its people and purpose, creating long lasting solutions to meet the needs of generations to come.

- As a Senior Engineer, you will provide technical design skills working in a team in the delivery of a range of projects, involving highways, civil, drainage and flood, alleviation schemes, ensuring accurate and efficient project delivery for internal and external clients.
- The role will enable you to further develop your technical skills, applying your expertise to help us continue driving forward in both technical quality and service efficiency.
- Have full working knowledge of Microdrainage, PDS, Site 3D (or similar but not CIVILCAD) and Autocad.
- You will have a relevant degree or similar experience and ideally be professionally qualified, together with at least 5 years' experience in a similar role.
- You will represent the Company at project meetings, public meetings. High commitment to thorough preparation and professional presentation.
- You will build and maintain good client relationships and maintain client confidence and attract new and repeat business.
- You will work well with in a small team environment.

We will reward you with a competitive salary, attractive bonus scheme, excellent company benefits, including a 37.5 hour working week, paid overtime, 25 days annual leave, pension scheme, life assurance, private health care and paid professional subscriptions.

Base Salary subject to experience
